REPORT OF THE

COMMISSIONERS

OF THE LAND OFFICE

IN RESPONSE TO A RESOLUTION OF THE HOUSE OF COMMONS

PASSED ON THE 12TH MARCH 1881

FOR THE YEAR 1880-81

IMPORTATION AND EXPORTATION

OF LAND

PRINTED BY THE STATIONER GENERAL, LONDON

1881

P R E F A C E.

IN order to understand the better the following Representation on the Corn Trade and Corn Laws of this Country, it is proper to premise, that in a former Representation to His Majesty, presented about the Middle of last December, it was shewn, that the Price of Wheat, taken on an Average from the several Markets of England, was at that Time Fifty-two Shillings per Quarter—That the Price of Wheat, as taken from the Market of Amsterdam, which is a free Market for Corn, and affords therefore the best Criterion of the Medium Price of Europe, was, by the lowest Estimation, Ten Shillings higher per Quarter—That the Prices of Corn in other Foreign Countries, were much higher than in ordinary Years—That the old Stock of Wheat was nearly exhausted in most Parts, by the Demands of the foregoing Year—That Bounties were given by the Municipality of Paris, on Wheat brought into the said City; and that Bounties were paid, as well by the Government of France, as by the Municipalities of many of the great Towns situated upon the Coast, on Wheat imported therein

therein—That in Spain, all Duties on Corn imported were taken off, and that Bounties were given on Wheat and Indian Corn imported into that Kingdom—That the Export of Wheat had been prohibited from several of the Northern Countries, from whence great Quantities of that Article are usually drawn, for the Supply of the Southern Countries of Europe—That, in Expectation of a Scarcity, many Governments had formed Magazines for the Sustainance of their Subjects; and that Contracts had been made with Merchants of England, for the Delivery of American Wheat at Sixty-two and Sixty-five Shillings per Quarter, and for the Delivery of American Flour at Sixty Shillings per Sack, on its Arrival in the Channel.

It was also shewn, that from a Failure in the Execution of an Act passed in the last Session of Parliament, there was at that Time no Law in Force, sufficient to prevent the Exportation of Corn, whatever the Price thereof might be, or to permit the Importation upon low Duties, if it should be found necessary.

From a due Consideration of all these Circumstances, the Privy Council then advised His Majesty to issue an Order in Council for preventing the Exportation, and allowing the Importation, of several Sorts of Corn, until the Sense of Parliament could be taken on this Subject, in order to insure to His Majesty's Subjects a Continuance of the Advantage they then enjoyed, of being supplied with Corn at a much cheaper Rate than it could be obtained in most of the neighbouring Countries, and thereby to
execute

REPRESENTATION, &c.

At the COUNCIL CHAMBER, Whitehall,
the 8th of March 1790.

L. S.

By the Right Honourable the Lords of the
Committee of Privy Council, appointed
for the Consideration of all Matters re-
lating to Trade and Foreign Plantations.

To the KING's Most Excellent MAJESTY.

May it please Your Majesty,

THE Committee of Your Majesty's most Honourable Privy Council, appointed for the Consideration of all Matters relating to Trade and Foreign Plantations, humbly offered to Your Majesty in a former Representation their Advice on such Measures as, in their Judgment, were necessary, in order to apply an immediate Remedy to the Evils likely to arise from the Difficulties which had occurred in the Execution of the Laws of this Kingdom, made for regulating the Exportation and Importation of Corn, and to preserve Your Majesty's Subjects from being exposed to that Distress for Want of this indispensable Article of Subsistence, which has of late been severely felt in several neighbouring Countries; but the Committee having in their Investigation of this Subject been led to consider the State of the Corn Laws, and the Trade of Corn in general, and finding that some further Provisions are wanting to amend and improve the said Laws, they presume to lay this Second Representation before Your Majesty, and therein to submit to Your Majesty's Consideration their Sentiments on such Amendments and Alterations in the subsisting Laws, as appear to them to be expedient.

The Committee thought this Subject the more deserving their Attention, as they find, by an Account* laid before them of the Quantity of Corn imported and exported during the last Eighteen Years, that this Kingdom, which, in former Times used to produce more Corn than was necessary for the Consumption of its Inhabitants, has of late Years been under the Necessity of depending on the Produce of Foreign Countries for a Part of its Supply.

Barley is the only Article, of which this Country produces more, at present, than it consumes. We had formerly a large and profitable Trade in the Export of Corn;—upon an Average of Nineteen Years, from 1746 to 1765, the Corn exported from this Country is supposed to have produced a Net Profit of not less than £.651,000 per Annum;—but in the Eighteen Years from 1766 to 1788†, by setting the Value of the Corn imported against that of the Corn exported, and deducting the Amount of the Duties received thereon from the Bounties paid during the same Period, it will appear that this Country has upon an Average sustained a Loss in this Trade of £.291,000 per Annum, which Sum it has Annually paid to Foreign Nations for the Supply of its Inhabitants.

Whitchell,

Bounty paid on Corn exported from } Great Britain 1788 — — }			— —	£. 45,182 12 3½

Note. * The Accounts in Scotland of Imports and Exports were not kept by the Commissioners of the Customs there before the Year 1755, in such a Manner as to enable the Committee to obtain an accurate Account of the Corn Imported and Exported to and from that Part of the United Kingdom during the first of these Periods.

Note. † An Account of the Quantity of the several Sorts of Corn Exported and Imported from and to Great Britain, in the Year ending the 5th January 1790, has not yet been obtained by the Committee, as the Accounts from Scotland have not been hitherto transmitted. — But the Bounty on Corn exported from England only, in the Course of this Year, amounted to £. 76,551. 16. 1½, which is considerably more than double the Bounty paid on all Corn exported from England and Scotland on an Average of the Eighteen preceding Years, and proves how great a Quantity of Corn during the Course of last Year was carried out of the Kingdom, before the Prices of the several Sorts exceeded the Prices at or below which Export is by Law permitted.

The following TABLE will shew the Quantity of each Sort of Corn imported Annually into England, upon an Average of 19 Years, from 1746 to 1765, inclusive: And also, the Quantity of each Sort of Corn imported Annually into England and Scotland, upon an Average of 18 Years, from 1770 to 1788, inclusive.

Vide Appendix, N° 5 and 6.

The Committee hope, that a Change so extraordinary in a Concern of so much Importance is only to be imputed to an increased Population; to the Numbers of Horses and other Cattle, which we now breed and maintain more than formerly; and to that Opulence which has generally diffused itself amongst all Ranks of Men, from the Extension of our Trade and Manufactures, and which has occasioned an increased Consumption of all the Necessaries of Life;—for there can be no Reason to suppose either that the Agriculture of the Country has of late declined, or that, for so long a Continuance of Years, the Seasons can have been uniformly unfavourable.

The Committee are further impressed with the Importance of this Subject, and are the more induced to think that it requires immediate Attention, as from Accounts they have received of the Produce and Consumption of Corn in most European Countries, they are inclined to believe, that in ordinary Years the Produce of Corn in Europe is not more than equal to the Consumption of its Inhabitants; and that whenever the Crops fail in any Degree, the Deficiency can only be supplied from the Harvest of America.

The Lords of the Committee are of Opinion, that the Principles which are best adapted for the Conduct and Regulation of other Trades, cannot in every Respect be applied to this of Corn: Other Trades in general produce only the Comforts and Conveniences of Life—This has for its Object an Article that is indispensably necessary for Subsistence. If they at any Time decline, some Individuals may be affected in their Fortunes, and the Public can only suffer a temporary Loss and Inconvenience;—but a mistaken Speculation in the Trade of Corn may produce Dearth—the Consequence of which will always be general Distress, and sometimes popular Commotions: So that in the Management of this Trade, Government ought ever to have in View, not only the Prosperity of the Trade itself, and the Interests of those concerned in it, but the Subsistence of the People.

The best Market for Corn in every Country is the Home Market; and the Circulation of it within every Kingdom ought to be free, so that the Surplus of One Part may supply the Deficiencies of the other, and that the Price throughout the whole Country may be brought as near as possible to a Level.

To facilitate the Circulation of Corn, this Kingdom enjoys peculiar Advantages, which arise from its Situation as an Island, from the Number of its Canals, and the Excellence of its Roads; and by these Means the populous and manufacturing Counties in some Parts of the Island can draw the necessary Supplies from other Parts which are less populous, but more productive of Corn.

In other Countries Magazines of Corn are formed by their respective Governments, or by the principal Magistrates of great Cities, as a Resource in Times of Scarcity. This Country has no such Institution—The Stores of Corn are here deposited in the Barns and Stacks of wealthy Farmers, and in the Magazines of Merchants and Dealers in Corn, who ought to be by no Means restrained, but rather encouraged in laying up Stores of this Nature, as, after a deficient Crop, they are thereby enabled to divide the Inconvenience arising from it as equally as possible through every Part of the Year; and by checking improvident Consumption in the Beginning of Scarcity, prevent a Famine, which might otherwise happen before the next Harvest. The Inland Trade of Corn therefore ought to be perfectly free.—This Freedom can never be abused—To suppose that there can be a Monopoly of so bulky and perishable a Commodity dispersed through so many Hands over every Part of the Country, is an idle and vain Apprehension. The ancient Laws of this Kingdom, which

which by a false Policy restrained the Inland Trade of Corn, have in general been repealed: The 15th Cha^r II. Ch. 7, which does not permit the buying Corn to sell again, and the laying it up in Granaries, except when the several Sorts of Corn are below certain Prices therein mentioned, is the only Law of this Description which will now be found in our Statute Book, and ought certainly not to remain there any longer.

But to extend the Freedom of this Trade to an unrestrained Export of Corn to Foreign Countries, would, in the Opinion of the Committee, be productive of the greatest Evils; such Export might, in a Year of general Scarcity, exhaust the Stock of any Kingdom, and deprive its Inhabitants of what is necessary for their Subsistence, by sending it for the Supply of other Nations. There is hardly a Country in Europe, the Government of which, in the Course of last Year, did not find it necessary to interpose either to retain its own Stock wholly for the Consumption of its Inhabitants, or at least to prevent an unlimited Exportation: And, it is singular to observe what Industry and Artifice have been employed by the Merchants, and even by the Ministers of many Countries, to break through these Restraints, and to draw Supplies from their Neighbours. The greatest Advocates for a Free Trade in Corn with Foreign Countries, have always cited the Practice of Hamburgh, Holland, and particularly of the Town of Amsterdam, being free Markets for Corn, as a Proof that no Inconvenience would arise to the Inhabitants of a Country by allowing at all Times perfect Liberty in the Import and Export of Corn. The Senate of Hamburgh, sensible of the Imperfection of such a System, have always kept a Magazine well stored with every Sort of it, to provide for the Consumption of their own Inhabitants, in Cases of Emergency: And, in the last Year, many Towns of Holland thought it necessary to prohibit the Export of Corn from their own Precinct and Jurisdiction to other Towns within the same Province; and the free Circulation of it was thereby prevented even in their own Country; and the Magistrates of Amsterdam, which is the greatest Corn Market of Europe, though they kept their Port open for the Importation and Exportation of Corn, yet, being fearful that the Prices would rise so high as to occasion Distress to its Inhabitants, collected and laid up in Magazines, at the Public Expence, great Quantities of Corn, and sold it to the People at reduced Prices. And, during the last Autumn, if the Laws of this Country had not restrained the Export of Corn, and Your Majesty had not providently interposed to carry the Intention of the Legislature in this Respect into perfect Execution, Your Majesty's People would have been deprived of the Advantage they now enjoy, of purchasing this necessary Article of Subsistence at a much cheaper Rate than those of any neighbouring Nation.

It appears therefore that the Principles on which our Corn Laws are founded are in general wise; the Two Objects they have in View are, first to secure a reasonable Price at all Times to the Farmer, and in the next Place to prevent that Price being at any Time so high as to distress the Poor and the Manufacturer. With a View to the first of these Objects, Export is allowed, and even encouraged by a Bounty, till the Price of Wheat arrives at 44s. per Quarter; and the Import of Foreign Wheat into this Country is restrained by a high Duty, till the Price of Wheat in the Home Market arrives at 48s. The same Policy is observed with respect to other Articles of Corn.—It is a true Observation, that no Market will be plentifully supplied with Corn, unless some Liberty is given of disposing to Profit of the Surplus, for which there may be no Demand; without this Liberty the Farmer would endeavour so to contrive, as to produce no more Corn than could be sold in the Home Market at a reasonable Profit, and his Speculations would extend no further; the Consequence would be, that he would frequently produce less than the Home Market would demand, and Scarcity must sometimes ensue; for it has been found by Experience, that a very small Deficiency of Crop will raise the Price in a very high Degree. †

It is right therefore to allow the Export of Corn, whenever it is sold under a certain Price:—it is not necessary for the Committee to offer any Thing in Justification of that Policy, which commenced at the Revolution, of encouraging by Bounty this Exportation, and which the Legislature has thought fit to continue to the present Time. Whatever Doubts may be entertained by some, of the Wisdom of this Measure, it cannot surely be thought prudent to alter it at present; for it is a certain Fact that the Agriculture of this Country has progressively increased and flourished from the Time when this Bounty was first granted; tho' it is true that other Causes have been assigned for this Improvement—This Bounty may be considered as a Compensation made to the Farmer for the Restraints imposed on his Trade, in order to ensure Subsistence to the People: And it may well be doubted whether the Exportation which is necessary to encourage Tillage in a Degree sufficient for the Home Supply (as before stated) would take Place if this Bounty should be withheld.—In all Years, and particularly in those of reasonable Plenty, the Price of Corn is lower in the Countries bordering on the Baltic, and in America, than it is in Great Britain.—In the North of Europe Corn can be more cheaply raised, because the Value of Land is less, and the Price of Labour is lower.—In America, the Value of Land is greatly less, and from the Extent of their Farms, they are able to resort to new Lands, or to substitute Fallows in the Place of Manure, and can therefore raise Corn without this additional Expence; and these Circumstances more than compensate the higher Price of Labour in that Country.—Without the Aid therefore of the Bounty, the Merchants of the Countries before mentioned would be able to under-sell our Corn Factors in Foreign Countries; and in Consequence thereof, the Surplus Corn of this Kingdom would never find a Vent, except in Times of general Scarcity on the Continent (as of late has been the Case) and it is probable that in common Years, when, in order to keep up the Price at Home, some Sale in the Foreign Market is most necessary, very little Corn would be exported from Great Britain.

When the Price of Wheat is from 44s. to 48s. per Quarter, neither the Exportation of British Wheat, nor the Importation of Foreign on low Duties, is allowed; from which it may be inferred, that it is the Opinion of the Legislature, that between 44s. and 48s. is the Medium Price at which Wheat ought to be sold in the Markets of this Country, for the Encouragement of the Farmer on one Hand, and the comfortable Subsistence of the People on the other. It has been remarked by attentive Observers, that in manufacturing Towns there is more Regularity of Conduct, and more productive Industry, when Corn is not at a Price unusually low; but the Condition of the Country Labourer certainly requires that the Price of it should be low, that he may be enabled by his Wages to purchase what is necessary for his Subsistence.—As soon as the Price of Wheat passes 48s. the Legislature have thought it their Duty to attend to the Necessities of the Poor, and to encourage the Importation of Foreign Wheat, by allowing it to be imported at very low Duties.

The Whole of this System wisely corresponds with those Principles by which the Corn Trade ought to be conducted. The only Doubt that can be entertained upon it is, whether the Export does not stop before the Price is sufficiently high for the Encouragement of Agriculture, and the Interest of the Farmer—It is singular that the Price at which Corn is prohibited to be exported is now lower than it was above a Century ago, and that the Price at which Foreign Corn is permitted to be imported at reduced Duties, is now also lower than it was above a Century ago; and during this Period the Prices of the principal Sorts of Corn, taken upon an Average of a Number of Years, do not appear to have advanced in an equal Degree with the Prices of many other Articles which are of general Use, and even of some which are the Produce of the Farm; and there are those who doubt whether this Circumstance has not contributed to make the Quantity of Corn produced not equal to the Consumption, as it is at present.

The Policy of our Laws has however produced an Effect highly advantageous, both to the Grower and Consumer of Corn, by rendering the Vicissitudes of Plenty and Dearth less frequent than they were formerly, and by making the Price of Corn more steady and uniform.—The Farmer may now at all Times depend on a certain reasonable Price, and feels that his Labour in cultivating his Land will not be wholly unprofitable—On the other Hand, the Poor have no Reason to apprehend, as in ancient Times, the Calamities of Dearth and Famine.

The Committee having now traced the Principles, by which in their Opinion the Corn Trade ought to be regulated, and to which our Corn Laws appear in general to conform, they will proceed to consider in what Respects these Laws are defective, and what Amendments ought to be made to them, so as to make them fully correspond with the Principles before stated.

It appears from the Provisions of ancient Statutes, and particularly from the Preamble of Stat. 15 Hen. VI. C. 2. that it was not lawful * to carry Corn out of the Realm without the Licence of the King—By this Statute Permission was first given to export several Sorts of Corn out of the Realm, whenever the Price of each Sort was at or below the Prices therein mentioned.

By subsequent Statutes the Export of the different Sorts of Corn was in like Manner allowed whenever the Price of each Sort was at or below the Prices mentioned in each Statute respectively.—The following Table, N° 4, will shew what the Prices were, at or below which Corn was allowed to be exported at different Periods, according to the Monies of the Times.

* In Maddox's History of the Exchequer, Ch. 14. Sec. 15, there is an Account of several Amerciaments for exporting Corn without Licence in very early Times.

It

It is extraordinary that no one of the before-mentioned Statutes, nor any Statute till 13th Year of Your Majesty's Reign, C. 43, enacts any Rule for ascertaining the Prices, according to which the Export should be allowed, or the Bounty be paid, though some of them establish Regulations for ascertaining the Quantity of Corn so exported, and the Quantity on which the Bounty was to be paid.

The Officers of the Customs, being left without any Rule prescribed by Law, pursued a Method of their own: They obliged the Exporter, in making the Entry Outwards, to swear that the Prices of the Corn so entered for Exportation did not, on the last Market Day, exceed the Prices at which Export was to be allowed, or Bounty to be paid; and sometimes they obliged the Exporter to produce a Certificate to the same Effect on the Oath of some supposed credible Witnesses—This Practice was probably founded on the Directions given in the 1st W^m and Mary, C. 12. for ascertaining the Quantity and Quality of the Corn so exported.

By the before-mentioned Statute of 13th Year of Your Majesty's Reign, it was enacted, that in Cases of Exportation from the Ports of England, the Prices of Corn should be ascertained according to the Methods directed by preceding Acts of Parliament, as well as by that Act, for ascertaining the Prices of Corn or Grain in Cases of Importation; and the Bounty was to be paid according to Prices ascertained in the same Manner.—It is proper to observe, that the Prices for regulating Importation were, according to the 1st Ja^s II. Ch. 19, ascertained only Four Times in each Year—By the same Act of 13th Year of Your Majesty's Reign, the Prices of Corn in Scotland, both in Cases of Exportation and Importation, and for the Payment of the Bounty, were to be ascertained by Returns made Four Times a Year, from the Sheriffs or Stewards Depute, or their Deputies, on the Oaths of Two Persons qualified in the Manner in that Act described.

This Method of ascertaining the Prices being found very inconvenient and detrimental to the Export Trade of Corn, as the Prices which were to govern the Exportation and the Payment of the Bounty could be altered only every Three Months, though the real Prices might in the mean Time be very much increased or diminished, it was enacted in the next Session, by Statute of the 14th Year of Your Majesty's Reign, C. 64, that the Prices of Corn exported from Great Britain should be regulated and governed by the Average Prices at which such Corn should be respectively sold in the public Market, at or near the Port or Place from whence such Corn was intended to be exported, on the last Market Day preceding the shipping thereof; and that the respective Bounties on each Sort of Corn should be paid according to such Prices.

But even in this Act no Method was prescribed for ascertaining what these Prices were, so that the Officers of the Customs were still obliged to have Recourse to the Method that had before been adopted and practised by themselves—But this last-mentioned Act, as far as relates to the Port of London, and the Ports of the Counties of Kent and Essex, was repealed by Stat. of 21st Year of Your Majesty's Reign, C. 50, and a new Mode of ascertaining the Prices in those Ports was therein enacted; an Officer created by that Act, and called *Inspector of Returns of Corn*, was directed to receive from the several Factors of the Corn Exchange an Account of the Quantity of each Sort of Corn they had sold in the Course of the preceding Week, and of the Prices, and the Names of the Purchasers; and from the Prices at which the whole Aggregate Quantity of each Sort of Corn so respectively sold in the Course of that Week he was to compute and form an Average Price of each Sort of Corn, and such Price was to be taken as the Average Price during that Week, and the

the Import and Export of each Sort of Corn, and the Bounty payable thereon, was to be thereby regulated in the Port of London, and in the Ports of Kent and Essex.

In this State, which was certainly very imperfect with respect to all the Ports of Great Britain, except those of London, Kent, and Essex, the Law for ascertaining the Prices of Corn, as far as related to Exportation and the Payment of the Bounty, continued till the passing of the Act of last Year.

As it appears by some ancient Statutes not to have been lawful to carry Corn out of the Realm without the Licence of the King, it may be collected from others that it was generally lawful to import Foreign Corn into this Kingdom; and from both these Circumstances it may justly be inferred, that the Legislature in ancient Times was more solicitous to provide for the plentiful Subsistence of the People, than to encourage Tillage within the Realm.

By Statute 3d Edward IV. C. 7, several Sorts of Foreign Corn were for the First Time prohibited to be imported, till the Price of each exceeded the respective Prices mentioned in the said Statute.

This Statute continued in Force till 21st Ja^r I. when it was repealed, and the Importation of Foreign Corn was again generally permitted, but Corn so imported was always subject to a Duty, which varied according to the Law in each Period.

By 12 Cha^r II. C. 4. the Importation of Foreign Corn first began to be regulated in the Manner that subsists at present, that is, by imposing High Duties when the Price of each Sort of Corn did not exceed certain Prices, and Low Duties when it exceeded the said Prices.

The following Table, N^o 6, will shew the Prices at which Corn was at any Time prohibited to be imported, and at what Prices the High and Low Duties on Importation respectively took Place, and what was the Amount of those High and Low Duties upon each Sort of Corn at each Period respectively.

Till the First Year of Ja^s II. no Rule had been enacted for ascertaining the Prices, according to which the High or Low Duties on Corn imported were to take Place; but as it was then found by Experience that great Quantities of Corn had been imported, without paying the proper Duties, it was enacted by Statute 1 Ja^s II. Ch. 19, That the Justices, at their Michaelmas and Easter Session, by the Oaths of Two or more Persons, not being Dealers, and by such other Ways and Means as to them should seem fit, should examine and determine the common Market Prices of Middling English Corn, as the same was commonly bought and sold in the Counties where any Foreign Corn might be imported, and certify the same to the Chief Officer of the Customs at the Port where the Importation might be, and the Duty on Foreign Corn imported was to be paid according to such Certificate; and the same Method of ascertaining the Prices was to be pursued by the Lord Mayor and Aldermen, in the City of London, in the Months of October and April; and by Statute of Sixth Year of Your Majesty's Reign, Ch. 17, They were to ascertain the Prices in like Manner in the Months of January and July.

The Justices in some Counties having neglected to send their Certificates at the Michaelmas Session of 1728, gave Occasion to passing Statute 2 Geo. II. Ch. 18, by which, in order to remedy the past Neglect, the Justices of those Counties were authorized to settle and determine the Prices at the next Quarter Session. And it was further directed, that, in all future Cases of like Neglect, the Collector should be empowered to receive the Duties on Corn imported according to the lowest Prices mentioned in Stat. 22 Car. II. Ch. 13.

But the Mode of ascertaining the Prices under Stat. 1 Ja^s II. Ch. 19. having been found, upon further Experience, to be ineffectual, a new Method was established; and it was enacted by Stat. 5 Geo. II. Ch. 12, that the Justices in every County, where Corn is imported, should at every Quarter Session give in Charge to the Grand Jury to make Enquiry and Presentment upon their Oaths of the common Market Prices of Middling English Corn, of the respective Sorts mentioned in Stat. 22 Cha^s II. Ch. 13; this Presentment was to be certified by the Justices to the Chief Officer of the Ports where Corn is imported, and the Duties on Foreign Corn imported were to be paid according to the Prices mentioned in such Certificate.

The Method however of ascertaining, in the Port of London, the Prices of Corn, as directed by the Stat. 1 Ja^s II. was not repealed by this Act. By this Statute all Foreign Corn once imported was forbid to be exported from any of the Ports of England, or even carried Coastwise from One Port of England to another; but this Restraint was not extended to the Ports of Scotland.

The Statute of the 13th Year of Your Majesty's Reign, Ch. 43, made no Alteration in the Method of ascertaining the Prices for the Purposes of Importation in the Ports of England, but left it as directed by former Acts. But with respect to Scotland, it directed that the Prices should be ascertained by the Sheriffs and Stewards Depute, or their Deputies, in the Manner already mentioned.

By Statute of 21st Year of Your Majesty's Reign, Ch. 50, a new Method of ascertaining the Prices in the Port of London, and in the Ports of Kent and Essex, for regulating the Importation of Corn, was enacted. It was the same as that which has already been described for regulating the Exportation, and Payment of the Bounty.

In this State the Law for ascertaining the Prices of Corn, for the Purpose of regulating the

Importation thereof, continued till the passing of the Act of last Year. It was certainly much more perfect than the Mode for ascertaining the Prices that were to regulate the Exportation, and Payment of the Bounty; and the Legislature appears never till last Session to have directed its Attention to the Prevention of Frauds in the Exportation of British Corn, or in the Payment of Bounty, in the same Degree as to the Prevention of Frauds in the Importation of Foreign Corn.

There exists however in the Laws of this Country another Method for ascertaining the Prices of the several Sorts of Corn in this Kingdom, though enacted for another Purpose. By Statute of the 10th Year of Your Majesty's Reign, Ch. 39, intituled, "An Act for registering the Prices at which Corn is sold in the several Counties of Great Britain, and the Quantities exported and imported," the Justices at the Quarter Session for each County, Riding, Division, or Stewartry, held after the 29th September in every Year, are directed to order Returns to be made Weekly of the Prices of Wheat, Rye, Barley, Oats, and Beans, and of Bigg in Scotland (Pease are omitted) from such and so many Market Towns as they shall think fit, not being less than Two, nor more than Six, in each County, and to appoint a proper Person, being an Inhabitant, for the Purpose of making such Returns to an Officer created by this Act, who was to be appointed by the Commissioners of the Treasury, and was to receive and publish them in Manner hereafter mentioned. The Meal Weighers of the City of London are directed to make the like Returns of Corn sold in the said City. In case the Justices neglected to appoint the Persons before mentioned, the Lords of the Treasury were authorized to appoint them; and the Persons so appointed were to be paid a Sum not exceeding Two Shillings for each Return, upon a Certificate from the Receiver that such Return had been properly made. And an Abstract of all these Returns is directed to be published by such Receiver once a Week in the London Gazette, and to be transmitted Four Times in every Year to the Clerk of the Peace of each County, and to the Lord Mayor and Aldermen of the City of London.

The Committee have examined the Receiver of Corn Returns, appointed under the Act, and they find that the Provisions of this Act have been completely executed in every Part of England:—That the Justices at their Sessions have regularly appointed the Persons who make the Returns; and that the Lords of the Treasury have been never under the Necessity of exercising the Authority vested in them, in case of the Neglect of the Justices: That the Returns are generally made from Three to Six Markets of each County: That the Persons making the Returns are satisfied with the Allowance of Two Shillings for each Return; and the Receiver is of Opinion that these Returns in general are as carefully made as the prescribed Manner of making them will admit. The Receiver also informed the Committee, that from Scotland the Returns, immediately after passing the Act, were made pretty generally; but that the Magistrates have by Degrees ceased to execute the Law, so that he has received of late no Return from that Part of the United Kingdom, except from Inverary; and the Reason, as he believes, is, that the Magistrates consider the Execution of this Act as an unnecessary Expence.

The Committee have thought fit to state the several Regulations of this Act, and the Manner in which they have been executed, in order to shew that there exists a Method of collecting the Prices of the several Sorts of Corn in the Markets of this Kingdom, which in England continues to be compleatly executed, and which was executed in Scotland for some Time after passing the Act, though this Act was made for a different Purpose than that of regulating the Importation or Exportation of Corn, or the Payment of the Bounties.—And it was to the Averages, formed according to the Directions of this Act, that Your Majesty found

found it necessary to resort, when the Act of last Year failed in its Execution, and when You were graciously pleased to make Regulations for the Importation and Exportation of the different Sorts of Corn by Your late Orders in Council.

The Committee will have Occasion also to refer to the Regulations of this Act, in the Advice which they shall think it their Duty to offer to Your Majesty at the Conclusion of this Representation.

The Committee will proceed next to state the Regulations of the Act of last Year; and they will then consider what Additions and Amendments should be made to this Act, and to the Corn Laws in-general.

This Act was made from a Conviction that the Provisions of former Laws for ascertaining the Prices of Corn were very imperfect, and that great Frauds had been committed under them. There can be no Doubt of the Existence of these Frauds, as has been shewn more fully in a former Representation on this Subject, which the Committee presented to Your Majesty.—The principal Provisions in which this Act differs from former Laws are, that it divides England into Districts, and the Average Prices taken in each District, in the Manner therein directed, are to regulate and govern the Importation and Exportation of the several Sorts of Corn, and the Payment of the Bounty thereon, in every such District. The City of London, and the Counties of Kent, Essex, and Sussex, form One District, and the rest of England is divided into Eleven other Districts, each consisting at least of Two Counties, except that the County of Norfolk is made a District of itself.

In the District which includes London, and the Counties of Kent, Essex, and Sussex, the Average Prices are to be taken from the Market of London, according to a new and improved Method.

Instead of requiring the Oath of only Two Corn Factors, chosen by Lot, to the Truth of their Returns, all the Corn Factors within the City of London, and the Suburbs thereof, are to swear that they will make true Returns; and any Person exercising the Business of a Corn Factor, without having taken this Oath, and obtained a Certificate thereof from the Lord Mayor, is to forfeit £. 50. A Weekly Average is to be made up of these Returns in the Manner directed by the former Act, and the Certificate of such Weekly Average sent to the Collector was not to regulate the Exportation of the several Sorts of Corn, and the Bounty payable thereon, for the Week to which these Returns refer, as directed by the said Act, but it is to regulate the same from the Time that such Certificate is respectively received by the Collector of each Port, to the Time that a Certificate of a new Average shall be received by him; and for the Purpose of regulating the Importation of Foreign Corn, an Average is to be made up, not of the Returns of Thirteen Weeks, as directed by the former Law, but of the Six Weeks preceding every Quarter Session, except in the Case of Oats, the Importation of which is still to be regulated by an Average made from the Returns of Thirteen Weeks; and a Certificate of such Averages, sent to the Collector of each of the Ports, is to govern and regulate the Importation from the Receipt thereof to the Time that he receives another Certificate.

In the other Eleven Districts the Justices at the Michaelmas Quarter Session are to nominate certain principal Market Towns, not being more than Twelve nor less than Eight in each District, from which Returns of the Prices of Corn are to be sent.—There are some Exceptions made in the Act with respect to the Number of Market Towns in particular Districts,

Districts, from a Consideration of local Circumstances.—The Justices are to appoint also, from among the Chief Constables, or such other Persons as to them shall seem proper (not being Dealers in Corn, &c.) One or more Persons residing in or near such Market Towns, to collect Weekly an Account of the Quantities and Prices of the Corn sold therein, from those who buy the same;—these Persons are to be called *Inspectors of the Prices of Corn Returns*, and they are directed to return in every Week, to the Receiver of Corn Returns in London, the Weekly Prices and Quantities of Corn bought in each Market Town.—Each Inspector is to take an Oath to make true Returns to the Receiver of Corn Returns, according to the Accounts delivered to him by the several Buyers, and to use his best Endeavours to procure true Accounts.—The Receiver of Corn Returns is required to make up a Weekly Average, and also an Average of the Six Weeks preceding every Quarter Session, of the Returns received by him from each District, according to the Manner practised in the City of London, as before described.—He is to transmit a Certificate of each Weekly Average, and also a Certificate of each Quarterly Average, collected from the Returns of each District, to the Ports of such District respectively, and such Weekly Certificate is to regulate and govern the Exportation of Corn, and the Bounty payable thereon; and such Quarterly Certificate is to regulate and govern the Importation of Foreign Corn, from the Receipt of the same by each Collector to the Time that he shall receive a new Certificate.

This Act contains many good Regulations for ascertaining the Prices of Corn, so as to prevent many of the Frauds committed in the Importation and Exportation of it, and in obtaining the Bounties.—But the several Clauses of the Act were very imperfectly drawn, so that, at the Time that the Committee laid before Your Majesty their First Representation, this Act had failed in its Execution in every District, except in that which is composed of the Port of London, and the Ports of the Counties of Kent, Essex, and Sussex;—since that Time Five Districts have made Returns conformable to the Act, but in the Six others the Act has not been carried hitherto into Execution.

Your Majesty's Attorney and Solicitor General, in their Letter of the 18th December last, annexed to the former Representation of this Committee to Your Majesty, gave it as their Opinion, “That in those Districts where Market Towns have not been selected and nominated, or Inspectors appointed by the Justices at the last Michaelmas Quarter Session, they cannot now be appointed, as no Authority is given by the Act for that Purpose.” And as the Magistrates in several Districts have omitted to exercise the Powers given to them in these Respects, the Act, as applicable to the whole Kingdom, ceases to be operative, and must therefore, as a general Regulation, be considered as existing no longer. All the Powers given by former Laws to this End are by this Act repealed; so that it is become absolutely necessary to pass a new Law. And with this View it may be proper to consider what Parts of the Act of last Year, or of the Acts that were thereby repealed, it may be fit to revive; what Parts of existing Laws it may be fit to continue; and what new Provisions it may be right to propose to the Legislature for their Judgment and Decision.

The Committee therefore humbly offer the following Advice:

1st. That England continue to be divided into Districts, according to the Plan of the Act of last Session; and that Scotland be divided into Districts in like Manner.

The Committee think, that according to the true Principles of the Corn Trade, as before stated, one general Average ought to be formed, and taken from the Prices of the

Markets

Markets of the whole Kingdom, to regulate the Payment of the Bounty, in all the Ports there

Such a Regulation would tend to equalize the Parts, which may be in Distress, a Supply from the and to preserve in the Kingdom a Stock at all Time; inhabitants — it would also remove the Bounty, as the Bounty would not Parts of the Kingdom for the Supply are in Want of it; for as long Foreign Countries, it can hardly Case no Bounty is paid) for as it is probable that the Plan, and as they now appear and making the Average Importation in all the Ports Wishes, that it would not In Inclination.

This Plan of Districts is certainly greatly preferable, and much less liable to Fraud, than that of making the Price of each Port the Rule to govern Importation and Exportation at Committee do not think fit to offer any Opinion on the Manner in which formed in the Act of last Year, as this Arrangement has so lately met with Parliament.

order to make the System in like Manner into Districts, and it is necessary that Scotland should be divided and Exportation there should no longer be regulated according to the defective and discordant System of former Laws, and that in a Business of common Concern every Part of the United Kingdom should be made subject to the same Regulations. — It was shewn by the Committee, in their First Representation to Your Majesty, that just before the late Orders in Council were issued, Wheat was exported from Scotland to Foreign Parts upon Bounty, while the Price of that Article was so high in England as to open the Ports there for the Importation of Foreign Wheat upon the Duties.

2d. That whenever the Export of any Sort of Corn is stopped in any one District, because the Price thereof is above the Export Price, Corn of the same Sort should not be allowed to be carried from thence Coastwise to any other District, the Ports of which are open for the Exportation thereof.

This Regulation will tend greatly to prevent Fraud; and as the Price of any Sort of Corn in a District, the Ports of which are open for Exportation, must be lower than in a District, the Ports of which are shut, it is evident that it cannot be carried for Consumption to a District, the Ports of which are open for Exportation.

3d. That the Act of 10th Geo. III. Ch. 39, for registering the Prices of Corn, so far as relates to the Appointment of Inspectors, be repealed, and that the Registry of Corn published Weekly in the Gazette, be formed upon the Averages taken, according to the Prices returned by the Inspectors appointed under the Act of last Year.

Though these Averages were taken for different Purposes, & same Way, and by the same Per these Two Ways, will frequently The Prices, as in One to speculate, but what he will often find that the Prices, he speculated, and he is thereby Act of last Year is certainly the mentioned.

If the Two Modes of collecting the Prices the Countries will be put to the Expence of Two the Act of last Year is, the Expence incurred by the arising from the Abolition of One Class of Inspectors, incurred by the new System.

4th. That a Duty of One Half-penny per Last be paid on all British Corn imported Coastwise, and One Penny per Last on all Corn imported from Foreign Countries into all the Ports of Great Britain, as is now paid in the Port of London; and that the Money arising from these Duties be made a Fund for the Inspectors, and defraying the other Expences incurred by this Act; and turns sent by the Post be not subject to the Payment of Postage.

The Object of this Proposition requires no Force.

5th. That the Inspectors be paid not by Salaries, as directed by the Act of last Year, but by a certain Allowance for each return, certified to have been properly made, by the Receiver of Corn Returns, according to the Act of the 10th Year of Your Majesty's Reign, Ch. 39.

It is obvious that the Object of this Regulation is, to secure the Execution of the Act.

That in case the Returns from any District shall not be completely made, according to the Directions of the Act, the Importation and Exportation of every Sort of Corn in that District shall be governed by the Average Price of the rest of the Kingdom.

It is obvious also, that this Regulation tends to secure the Execution of the Act, and to prevent in every such District any improper Importation or Exportation.

7th. That a Power be lodged in Your Majesty, with the Advice of Your Privy Council, during the Prorogation of Parliament, to prohibit generally the Exportation from this Kingdom of any Sort of Corn, and in like Manner to permit generally the Importation, on the Low Duties, of any Sort of Foreign Corn, whenever the Average Price thereof,

the Two several Acts before mentioned to be no Reason why they should not be taken in the Prices of the several Sorts of Corn, as taken in ent, as is shewn in Paper N^o 7 in the Appendix.— published in the Gazette, to enable the Merchant Corn to Port in order to import or export it, he are not the same as those on which of forming these Averages in the arly shewn in Paper N^o 7, before

at the same Time to subsist, stors; one Objection made to f the Inspectors.—The Saving defray Half the Charge in-

Whether, that it would not be Inclusion.

thereof, taken from the Returns of the whole Kingdom, is higher than the Price at or above which Foreign Corn is allowed by Law to be imported, if Your Majesty in Your Wisdom for the Public Benefit shall so think fit.

A discretionary Power of this Sort appears to have been vested in the Crown by a great Number of Acts of Parliament*, from Richard II. to the present Time; the Acts by which this Power was granted are cited in the Margin.—It has been found by repeated Experience, that the vesting such a Power in the Crown is necessary for the Welfare of the People.—Government possesses at all Times the best Means of discerning the general Exigencies of the Kingdom, and the State of Crops and Markets in Foreign Countries, and there can be no just Reason to suspect that it will at any Time be influenced by any bad Motive to exercise this Power improperly.

8th. That the Collector of the Customs at every Port in Great Britain do transmit Weekly to the Receiver of Corn Returns an Account of the Quantity of the several Sorts of Corn shipped in such Port to be carried Coastwise, with the Name of the Ship or Vessel, the Name of the Master, and the Port or Place in Great Britain to which the Corn was intended to be carried; and also an Account of the Quantities of the several Sorts of Corn brought Coastwise into each respective Port, with the Name of the Ship or Vessel, the Name of the Master, and the Name of the Port or Place from whence it is brought; and that the said Receiver do, at the End of every Three Months, transmit to the Commissioners of His Majesty's Customs in England and Scotland, an Account, to be formed and made up in such Manner as the said Commissioners shall approve, of the Quantity of the several Sorts of Corn shipped to be carried Coastwise from each Port, or brought Coastwise into each Port respectively.

There can be no Doubt that in the Course of the last Six Months considerable Quantities of Corn have been exported to Foreign Countries, which were shipped under the Pretence of carrying the same Coastwise.

The Commissioners of Your Majesty's Customs have the Merit of using every Endeavour to prevent this Evil, and there are already many wise Provisions in the Laws of this Country to make the Commission of this Fraud as difficult as possible. A Bond is given for landing the Corn so shipped to be carried Coastwise at some specified Port, or at some other Port or Place in Great Britain, and no where else—there can be no Doubt that the Regulation now proposed will be an additional Check to this Practice, for by bringing into One View an Account of the Whole of the Corn so carried Coastwise, and by comparing the Quantity shipped with the Quantity landed, every fraudulent Attempt may be detected.

9th. That the Warehouses in which Foreign Corn imported is to be lodged, under the Joint Lock of the King and the Proprietor, according to the Statute of the 13th of

Stat. 17 Ric. II. C. 7. 15 Hen. VI. C. 2. 1 & 2 Phil. & Ma. C. 5. 23 Eliz. C. 13. 39 Eliz. C. 7.
14 Geo. II. C. 3. 15 Geo. II. C. 35. 30 Geo. II. C. 1. 1 Ann. C. 2.

Your

to be Your Majesty's Design, Ch. 23, be provided at the Public Expence; and that the Officers and of the Customs whose Duty it is to attend those Warehouses be paid by the Public, as is now practised with respect to the Warehousing of Tobacco.

There is no Regulation in our System of the Corn Laws that is more beneficial and more deserves therefore to be extended and improved, than those Provisions which permit the Warehousing of Foreign Corn—this Regulation tends to secure to us a very important Branch of Commerce—it enables our Merchants, who receive Corn from the Americans in Payment of their Debts, to lodge it here, either for the Home or Foreign Market, as Occasion may require—it is also the only Method of forming Magazines of a public Nature in this Country, against Times of Scarcity and Distress, without Prejudice to the British Farmer and Grower of Corn—if the Legislature have thought it prudent to pay for the Warehouses in which Tobacco is deposited, and the Charges of the Officers who are appointed to attend these Warehouses, it is reasonable that the Public Revenue should defray the like Expence in support of a Trade which may in Time prove more valuable than that of Tobacco, and may become necessary, in certain Contingencies, for the Subsistence of Your Majesty's Subjects, and from what has been already experienced in the Case of Tobacco, the Committee have Reason to believe that this Expence will be no considerable Burthen to the Revenue.

That Foreign Corn imported and not warehoused, be not allowed again to be exported.

When the High Duties on Importation subsist, Foreign Corn is never imported, except to be warehoused; when the Low Duties commence, in consequence of Scarcity of Corn in this Country, Foreign Corn has frequently been imported; and in consequence of the Right which the Proprietors have heretofore had of re-exporting it, Frauds have been committed in exporting British Corn, which by Law is not then exportable.—The Legislature, convinced that Frauds of this Nature were committed, did by the 5th Geo. II. Ch. 12, prohibit the carrying Foreign Corn, once imported, to the open Sea, in order to be landed in any other Port of England.

The Commissioners of Your Majesty's Customs have the Provisions in the Laws of this Country to prevent this Evil, and there are already many wise Provisions in the Laws of this Country. If the Public pay the Expence of Warehouses, as above proposed, the Merchant can have little Reason to complain if he is obliged to lodge his Corn in a Warehouse provided by the Crown, under the Care of the public Officer.

11th. That Corn so warehoused be permitted to be taken out to be ground by the Importer or Proprietor, on Condition that he give Bond, not subject to any Stamp Duty, in double the Value of the said Corn, that he will export from the Port where it was warehoused, within Two Calendar Months from the Time of taking out the said Corn, a Quantity of Flour equal to the Corn so taken out, reckoning the Quantity of Wheat Meal, or other ground Corn, for every Bushel of such Corn unground, according to the Proportion as it is now settled by Law; or that he will pay the Duty chargeable on the said Corn at the Time that it was taken out of the Warehouse.—And that no Importer or Proprietor shall be entitled to the Receipt of any Bounty on any Corn or Flour exported by him, until after he has settled his Account of the Corn so taken out of the Warehouse, and discharged his Bond.

This Regulation will encourage in this Country the manufacturing of Foreign Corn into Flour—It will also facilitate the Trade, as many Foreign Countries may at Times be desirous of obtaining from this Market Flour instead of Corn.—In consequence of the Restrictions which accompany this Permission, no considerable Fraud can easily be committed. By Statutes the 15 and 16 Geo. II. prohibited East India Goods, being warehoused, are now allowed to be taken out to be dyed or glazed, on giving Bond to bring them back in a limited Time to be exported.

There is another Proposition of more Importance, which the Committee submit with greater Diffidence than any of the preceding; and which they only venture to suggest, in order that it may be taken into Consideration.

12th. That Wheat be permitted to be exported, but without Bounty, when the Price thereof is between 44s. and 46s. and other Corn when the Prices thereof shall be in like Proportion; and that Wheat be allowed to be imported into this Kingdom, from Your Majesty's Kingdom of Ireland only, on the Low Duties, when the Price thereof is at or above 46s. and other Sorts of Corn when the Prices shall be in like Proportion.

The Two Regulations contained in this Proposition to take Place, whenever the Parliament of Ireland shall make a Regulation with respect to British Corn, similar to the last in Favour of Irish Corn.

The Committee are inclined to think, that these Regulations are both beneficial in themselves; but they have coupled them together, as they think that the one is calculated to counteract any Evil which may be supposed to arise from the other.—The great Corn Counties of Great Britain are in general on the East Side of the Island, and there Corn is in general cheapest. The Capital is fortunately situated in the Midst of them: But many of the great manufacturing Counties and Towns are on the opposite Side of the Island, and there Corn is generally dearest.—The first of these Regulations will be beneficial to the Corn Counties on the East Side of the Island; the last of these Regulations will be beneficial to the populous and manufacturing Counties and Towns on the West Side of the Island, which are more conveniently situated for Importation from Ireland; and both Regulations, taken together, will contribute to bring the Price of Corn in the different Parts of the Kingdom more to a Level.

It is not probable that any great Quantity of Corn will be exported without Bounty, unless when Corn is much dearer in Foreign Countries than here, a Contingency which may sometimes, but does not often happen; and there is little Reason to apprehend that the Importation of Irish Corn into the Western Counties of this Kingdom will discourage the Agriculture of them, as much less Corn is grown there than is consumed by the Inhabitants, and the Price of it is consequently high.

It was the Opinion of the Commissioners of the Customs, in a Report presented to the Lords of the Treasury in 1774, that the Export of Corn should be allowed to continue, when the Price of Corn is something higher than that at which the Bounty ceases to be paid; and some of the best Judges on this Subject have expressed the same Sentiment.

There are several other Propositions for the Amendment of the Corn Laws of less Importance than those before stated, with which the Committee do not think it necessary to trouble

trouble Your Majesty; but if it should be thought fit that any of Your Servants should propose a Bill to Parliament for improving these Laws, the Committee will be ready to suggest them.

As the Corn Laws ought of all others to be generally known and understood, the Committee think that the subsisting Regulations, and such as may now be adopted, should be brought into as narrow a Compass as possible, and that the Act of the 13th of Your Majesty's Reign, Ch. 43, and the Act now to be proposed, should comprehend all the Regulations that are allowed to subsist; or perhaps, that even these Two Acts should be consolidated.

The Committee are decidedly of Opinion, that One permanent System should now be established, so that the Grower of Corn may know how to direct his Industry and his Speculations, and be sure that no temporary Measure will intervene, to deprive him of the Fruit of them:—The Corn Trade is in itself subject, from the Vicissitudes of Seasons, and other Circumstances, to greater Fluctuation than any other; it ought not to be exposed to the additional Uncertainty arising from frequent Alteration of Laws, and Changes of System.

In forming these Regulations, the Lords of the Committee have endeavoured equally to provide for the Prosperity of the Grower of Corn, and the Necessities of the Consumer.—The Interests of the Grower and Consumer are supposed by some to be at Variance: To reconcile them as much as possible, is the End which every wise Government should endeavour to attain.—The Interest of the Consumer is entitled to the First Consideration, so far as to preserve him, in every possible Contingency, from Scarcity and Distress.—And as Distress for want of this necessary Article of Subsistence cannot long exist in any Country without exposing it to those Commotions which frequently happen in Times of Dearth, it is not likely that the Grower of Corn would enjoy in Safety the Fruits of his Industry, unless due Attention is paid to this First and Capital Object;—but this Point being once secured, the Interests of the Grower should in the next Place occupy the particular Attention of the Legislature. The Production of Corn is the First and most important Occupation of the Subjects of every Country, and on its Success rests the main Support and Prosperity of every other Trade: For the Sake of the Consumer therefore, the most liberal Encouragement and Protection should be given to those employed in it; for without offering proper Incitements to their Industry, Plenty can never be procured—for these Reasons it will be found perhaps, on due Consideration, that the Interests of the Grower and Consumer, well understood, are less at Variance than at first they may appear.—In the Advice which the Committee have thought it their Duty to offer to Your Majesty, they have aimed at discovering the Point of Union at which these Interests meet; and they humbly refer to the Judgment of Your Majesty how far they have accomplished the Object they had in View.

ANTHONY FERGUSON.
Custom House, 15th Dec. 1789.

Appendix, N^o 7.

1st. **W**OULD the last-mentioned Method of making the Returns, according to the Directions of the Corn Act passed last Session, embarrass the Business, or make it so much more difficult in the Execution, that the Returns might not be so regularly made, or that the Persons making them would in consequence of any additional Trouble be dissatisfied with the Allowance now made them?

In answering the above Question, it will, I conceive, be proper to state the Manner in which Returns are made under the Act of the 10th Geo. III. and also those made pursuant to the Act of the last Sessions.

By the first-mentioned Act the Persons who make Returns receive a Sum not exceeding Two Shillings for each. They collect the Prices by Enquiry among the Dealers on Market Days; and when ascertained, they make up their Returns in the following Manner; viz.

County of
Leicester.

Leicester.

Saturday,
February 6th 1790.

A RETURN of the Prices of Corn from this Market.

		Price by the Custom- ary Measure.			Average.			Price by the Stand- ard Winchester Bushel of 8 Gallons.		
		£.	s.	d.	£.	s.	d.	£.	s.	d.
Wheat per Quarter, from	—	2	18	6	2	12	9	—	6	4½
	to	2	7	—						

Note.

The Quarter is 8 Bushels, the Bushel containing 8 Gallons and 2 Pints.

The Price of the other Sorts of Grain is given in like Manner.

From the Mode of collecting these Prices, it is not likely that the Inspectors can obtain them so accurately as could be wished, not being authorized to demand any Account from the Dealers, and the Dealers not being obliged to render them any.

The Method above stated, of giving the Average, is not a true one. For if a greater Quantity of Wheat was sold at £. 2. 18 s. 6 d. than at £. 2. 7 s. the Average would be more than £. 2. 12 s. 9 d.; and if a less Quantity was sold at the former than at the latter Price, the Average could not be so much as £. 2. 12 s. 9 d. It is therefore evident, that unless the

M

Quantity

Quantity is known, and the Cost of it, the *true Average Price* cannot be ascertained; of course the Returns made under the Act of 10th Geo. III. are not so accurate as those made pursuant to the late Act, which enacts, That the Buyers of Corn for Sale shall be sworn to deliver every Week, to the Inspector of the Market at which they buy, a true Account of the Quantities they purchase, and the Cost thereof.

When the Inspector has received such Accounts, which, at some Places, are very numerous, he enters them in a Book, from which he makes his Return to the Receiver of Corn Returns, as under, and then transmits a Duplicate of it to the several Collectors of Customs within his District.

County of Lancaster.

Manchester, Saturday, February 6th, 1790.

A RETURN of the Quantities and Prices of Corn and Grain, from this Market, for One Week, ended this Day.

	Quantities, Customary Measure.		Price by the Quarter.		Amount of each Parcel at the several Rates.			The Aggregate Quantity, Winchester Measure.		The Average Price per Quar- ter, Winchester Measure.			The Average Price per Bushel, Winchester Measure.		
	Qu ^r	Bushl.	s.	d.	£.	s.	d.	Qu ^r	Bushl.	£.	s.	d.	£.	s.	d.
Wheat by the Quarter, Win- chester Mea- sure.	4	4	58	—	13	1	—								
	51	4 $\frac{1}{2}$	55	4	142	13	1 $\frac{1}{2}$								
	8	4 $\frac{3}{4}$	54	6	23	8	4								
	93	3 $\frac{1}{4}$	54	4	253	15	— $\frac{3}{4}$								
	32	3 $\frac{1}{4}$	53	11	87	13	5 $\frac{1}{2}$								
	38	5 $\frac{1}{4}$	53	8	103	14	6 $\frac{1}{2}$								
	7	—	53	5	18	13	11								
	17	2 $\frac{1}{2}$	52	11	45	16	1								
	25	1	52	8	66	3	3								
	—	5 $\frac{1}{2}$	51	3	1	15	2 $\frac{3}{4}$								
	2	6 $\frac{1}{4}$	42	8	5	18	8								
	282	0 $\frac{1}{4}$	—		762	12	8	282	0 $\frac{1}{4}$	2	14	— $\frac{3}{4}$	—	6	9 $\frac{1}{4}$

If the Average of the above was taken according to the usual Method, under the Act of 10th Geo. III. by giving the Medium of the highest and lowest Price thus, Wheat from 58s. to 42s. 8d. the Average Price per Quarter would be only £. 2. 10s. 4 $\frac{1}{4}$ d. instead of £. 2. 14s. — $\frac{1}{4}$ d.

From what has been before stated, it is manifest, that the Duty of the Inspectors under the Act of 10th Geo. III. is considerably less than the Duty of the Inspectors under the late Act, and that the Allowance made to the former would be deemed very inadequate to the Trouble of the latter.

- 2d. Can you recommend any Method of making these Returns, which will render them as accurate as those directed by the Act of last Year, and yet not put the Persons, who are to make these Returns, under too great Difficulties in making them?

I can think of no Method better calculated for obtaining true Returns of the Prices of Corn and Grain, than that directed by the Act of last Session.

JN^o JAS CATHERWOOD,
Receiver of Corn Returns.

17th Feb^y 1790.

APPENDIX

24. Can you recommend any Method of making these Returns, which will render them as accurate as those directed by the Act of last Year, and yet not put the Persons, who are to make these Returns, under too great Difficulties in making them?

I can think of no Method better calculated for obtaining true Returns of the Prices of Corn and Grain, than that directed by the Act of last Session.

JNO. JAS. CATHERWOOD,
Receiver of Corn Returns.

17th Feb. 1790.
